How is this Curriculum Applicable to Modern Education ?

Our Integrated thematic curriculum is specially designed to combine the foundation of the national curriculum, and NCCA with enhancements from the Cambridge curriculum to give it a global edge, and produce a fun, well balanced and dynamic learning method.

Olifant's methods and facilities provide a safe, supportive, and stimulating environment for discovery that you will not experience anywhere else.

This is How We Learn at Olifant

Olifant is the only school that uses the privately designed 3E method that combines exploration, enrichment, and entrepreneurship. This method allows the children to discover the necessary foundation, apply it practically, and enrich it with specialized extra curricular activities.

A New Approach to Learning

Olifant's unique thematic facilities and classrooms are specially designed to enable each child to develop intellectually, socially, culturally, emotionally, and physically. Dynamic learning methods such as the moving classroom and daily uniform personal choice, keep the children stimulated and enhance the learning experience.

Central Park Playground

Multiculture School

International Teaching Method Adapted to Local Culture

Our vision is to set a global example of modern education, and keep the next generation of proud achievers a step ahead in this ever changing world.

At olifant we inspire one another to discover the best within ourselves and to nurture balanced and competent learners who are culturally aware, open minded and confident. We encourage respect, values and character development, while at the same time, providing countless opportunities for self expression and creativity.

COME AND SEE
